

Java Programming Question Bank

1. Arrays (Programming Questions)

1. Write a Java program to **find the maximum and minimum element** in an integer array.
 2. Input an array of integers and **count how many elements are even and how many are odd**.
 3. Write a program to **copy one array into another** without using built-in methods.
 4. Input an array of 10 integers and **print only the prime numbers**.
 5. Write a Java program to **sort an array in descending order** using selection sort.
 6. Input marks of n students into an array and **display the highest and lowest marks**.
-

2. Loops (Programming Questions)

1. Write a program to **print the multiplication table** of a number entered by the user.
 2. Write a program to **find the factorial of a number** using a loop.
 3. Print all numbers between 1 and 300 that are **divisible by both 3 and 5**.
 4. Write a program to **display the sum of the first 20 natural numbers**.
-

5. Write a program to **check if a number is an Armstrong number** (e.g., $153 = 1^3 + 5^3 + 3^3$).
-

3. Recursion (Programming Questions)

1. Write a recursive function to **find the factorial** of a number.
 2. Write a recursive function to **calculate the nth Fibonacci number**.
 3. Write a recursive method to **find the sum of digits** of a number.
 4. Write a recursive function to **reverse a string**.
 5. Write a recursive function to **find the greatest common divisor (GCD)** of two numbers.
 6. Write a recursive program to **print numbers from n down to 1**.
-

4. Strings (Programming Questions)

1. Write a program to **reverse a string** entered by the user.
 2. Write a program to **check if a string is a palindrome**.
 3. Write a program to **count the number of vowels, consonants, digits, and spaces** in a string.
 4. Write a program to **remove all duplicate characters** from a string.
 5. Write a program to **find the longest word** in a sentence.
 6. Write a program to **replace all vowels in a string with ***.
-

5. Conditional Statements (Programming Questions)

1. Write a program to **check whether a given number is positive, negative, or zero.**
2. Write a program to **input marks of a student and display the grade** (A/B/C/Fail based on ranges).
3. Write a program to **check if a given number is even or odd** using if-else.
4. Write a program to **check if a given year is a leap year.**
5. Write a program to **find the largest of three numbers** using if-else.
6. Write a program using **switch-case** to display the day of the week (1 = Sunday, ... 7 = Saturday).
